RE: Approval of Boeing's Interim Action Remedial Excavation Work Plan (Work Plan)
Solid Waste Management Unit #17, Hazelwood, Missouri, Facility
Permit # MOD00818963

Dear Mr. Haake:

The Missouri Department of Natural Resources' Hazardous Waste Program has reviewed the subject Work Plan dated October 20, 2005. We appreciate the additional clarifications regarding the Work Plan provided in your October 24, 2005, e-mail in response to Mr. Richard Nussbaum's e-mail comments of October 21, 2005. The subject Work Plan is hereby approved with the following comments.

As with past interim measures at the facility, we expect previously approved quality assurance/quality control protocols to be followed in sampling and analysis. We expect that standard Environmental Protection Agency quality assurance/quality control protocols will be applied to any testing (e.g., toxic characteristic leaching procedure, pH, flashpoint, paint filter) that has not previously been specified in department-approved documents.

We understand that the approved work is scheduled to begin next week. We have notified Ms. Christine Kump-Mitchell of the subject work. She may be contacting you to arrange a site visit to observe some of this work. If you have any questions, please contact
